

IT'S TAX TIME AGAIN!

DON'T WORRY WE HAVE YOUR BACK!

TAMING THE PAPER MONSTER

receipt bank

It's one of the biggest reasons people put off doing their taxes.... they just can't face pulling and adding up all those receipts. Introducing a technology solution that will tame the beast. (OK, you will still have to pull the receipts and bring them to us).

RECEIPTBANK WILL:

- Read the receipts you submit and extract the relevant information using OCR (optical character recognition);
- Create an Excel summary of all expenses and costs, sorted by vendor or by type of expense
- Identify and extract the relevant HST, to support your HST return or rebate claim; and
- Create a full PDF archive of all information submitted, so you can toss the paper

WHAT MIGHT I USE IT FOR?

- All supplier invoices or receipts. (It can also handle your invoices to customers, if you're using Word or Excel.)
- Home office expenses
- Auto expenses
- Medical expenses
- Donations

Be assured - we'll review what the machines do, rather than just assuming it's right.

Pricing: \$100 for up to 100 items (of all types). \$35 per 50 items thereafter.

NO MORE ADDING UP.

NO MORE PAPER TO KEEP.

IMPROVED RESILIENCE TO AUDIT!
